(a) 12 measured records, each scored against its own zero field
deployed arm on measured input (10/12 below 1)
proposed representation, forced on (7/12)
nRMSE / that record's true zero field
3.0
2.5
2.0
1.5
1.0
0.5
no skill (a zero field)
on measured input the shipped router does not use WavePrior:
it hands the estimate to a separate bank estimator
